Note: not upgradeable to a 4-14 feed system or bar drive.

### PERFORMANCE YOU CAN COUNT ON

### Reduce Your Heavy Equipment Down Time

This general use machine is perfect for contractors who are concerned about maintaining their own equipment. Whether you have a fleet of 10 or 300, the Cadet will reduce your heavy equipment down time and allow you to schedule repairs to suit your needs.

A new bar drive motor features a wide range of boring speeds from 30 to 230 rpm. These speeds will allow the user to use high speed steel or carbide. A full feed system with rapid traverse gives you feed in both directions.

It's hard to beat the value packed in this machine - all

the features you would expect at an affordable price.

Our field representatives can show you how easy it is to use one of these units - call to set up an onsite appointment today.
